Off the pitch, participants take part in sessions on sports psychology, nutrition, and performance, helping them grow as complete athletes. Beyond training, the programme offers an unforgettable experience through cultural excursions, stadium visits, and social activities, creating a truly international environment.

Send your video (best plays, training sessions or matches) oriented to your performance and projection. We evaluate technical, tactical and decision-making aspects.

This programme offers much more than standard football training, providing a unique environment where participants grow as both footballers and individuals under the direct supervision of official coaches from the ATM Academy.

The core of the programme is built on continuous football training designed to develop technique, tactics, and physical condition in a comprehensive way. Coaches focus on the vital pillars of the game, including ball control, passing accuracy, definition, decision-making, and teamwork. Every session is prepared and adapted to the specific age and level of the participants to ensure personal objectives are met.
